

RELAUNCH OF THE ALL-TIME CLASSIC GROHE EUROSMA RT KITCHEN

When planning a kitchen, the most important aspect is that it truly fulfills the needs of the people who use it. Therefore, when working with your customer on a new kitchen design, it is helpful to have a wide selection of fittings to ensure you can offer a design that will meet their requirements. With the new GROHE Eurosmart tap range, kitchen designers can meet the increasing needs of today’s customers – with new ergonomic features, contemporary designs and high quality at an affordable price.

The classic tap range is now available in six different variants with two different heights, a new 2-handle design and also as a wall-mounted fitting. The low spout also has a pull-out option. Each of the design styles available in **Chrome**, with a selection available in matt **SuperSteel** options, with both finishes offering an easy to clean and scratch-resistant surface.

- Available for low and high spout variants

PULL-OUT SPOUT

- For complete comfort when filling water into pots or while cleaning
- Dual spray control allows you to switch between regular flow and jet spray
- Available only for low spout variants

THE MUCH-LOVED EUROSMA RT RANGE ADAPTS TO MODERN CONSUMER NEEDS

EASY INSTALLATION

Thanks to the practical **GROHE FastFixation Plus** system, the installation of the kitchen tap is particularly easy and quick. Due to the tool-free and pre-assembled fitting, installation can be completed quickly and hassle-free.

SAFE WATER CONSUMPTION

With **GROHE Zero**, there is no contact of the water with lead and nickel within the mechanism of the tap thanks to isolated inner waterways that ensure an extra safe water consumption.¹

SUSTAINABLE WATER USE

GROHE SilkMove ES technology prevents unnecessary use of hot water by supplying cold water with the tap lever in the middle position, thereby saving precious water and energy.²

GROHE EcoJoy is a water-saving technology. An integrated flow restrictor reduces the water flow. While regular kitchen taps have a water flow of ca. 9l/min EcoJoy reduces the flow to 5,7 l/min, without compromising on comfort.³

¹ This feature is only integrated in specific Eurosmart product variants.

HOLISTIC KITCHEN DESIGN BY GROHE

The kitchen area is one of the hardest spots in the kitchen, with food and beverage preparation, cleaning and washing hands. GROHE not only offers kitchen taps, but also matching sinks and waste systems. GROHE Eurosmart kitchen taps are perfectly matched in design and function to the stainless steel sink lines K200 and K400, and undermount solutions. For customers who prefer a stylish dark sink, both sink series are also available as composite sinks in granite grey and granite black. GROHE sinks are available in a variety of different sizes to ensure there’s a sink to meet customer requirements.

MODERNISED ALL-TIME FAVOURITE FOR THE BATHROOM: GROHE EUROSMA RT

At GROHE, innovations are not only for developing new products but for reinventing and adapting existing favourites too. With the relaunch of the Eurosmart bathroom tap, GROHE is not only introducing the fourth generation of this popular contemporary design icon to match the Eurosmart kitchen range, but also launching exciting new product variants too. For further details see the GROHE Eurosmart bathroom fact sheet.

The range comprises washbasin, shower, bath and bidet solutions that match the Euro Ceramic collection perfectly in form and function, and simplify the bathroom planning process with a distinctive design choice that is consistent throughout the space.

Combining modern design with ergonomic functions and smooth installation, GROHE Eurosmart offers a reliable solution for any project.
